WENTZ CANA PENDANT

Cana (“cane” in Portuguese) series is a result of the designer studies on simple and organic forms, exploring the boundaries between the natural and artificial. The curve, inspired by sugar cane stalks, mixed with delicate details and LED, creates an interesting contrast between organic forms and contemporary design. The subtle indirect light allows it to be used in any room as complementary lighting and sculptural piece. The direct spotlight can highlight important details of interior design elements or personal objects.
