WENTZ
SOFĀ
DOBRA

A série Dobra foi criada a partir de um gesto natural: dobrar um material macio. Em cada peça, aplica-se uma força que respeita a resistência e a densidade da espuma. É como se uma grande almofada se curvasse e pausasse no tempo. O sofá Dobra é modular e permite diferentes composições em 5 variações de módulos. O revestimento exclusivo WE—KNIT®— malha 3D feita a partir de PET reciclado — combina uma experiência tátil, com alta resistência ao uso e sustentabilidade.

NOME
Sofá Dobra

DESIGNER
Guilherme Wentz

ANO DO DESIGN
2021

CATEGORIA
Sofá Modular

AMBIENTE
Área Interna

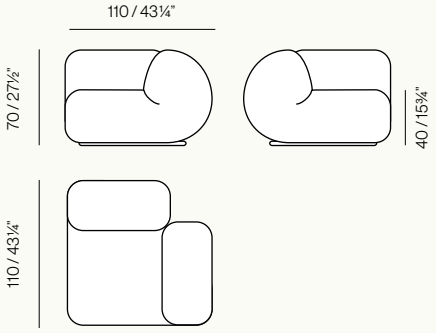

MATERIAIS
Madeira, Estofado

DESCRIÇÃO TÉCNICA
Sofá modular com estrutura em madeira, precintas elásticas, espuma hipersoft e revestimento WE—KNIT®. Pés em madeira com pintura preto fosco e acabamento emborrachado no seu inferior para evitar que os módulos deslizem no chão.

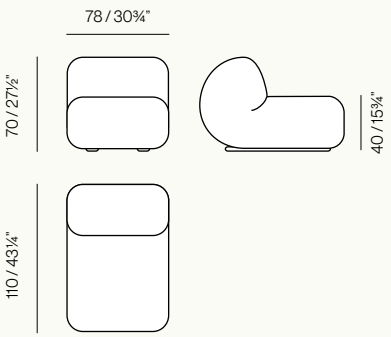

CERTIFICADOS
US California Tech. Bull. 117

WE—KNIT®

Na WENTZ, o design vai além da forma — ele vive nas próprias fibras de cada peça.
WE—KNIT® é nossa exclusiva tecnologia de tricô 3D, desenvolvida para criar revestimentos flexíveis e sem costura que se moldam perfeitamente à estrutura, realçando a pureza do design. Essa inovação permite que cada produto seja concebido e finalizado com materiais desenhados por Guilherme Wentz, oferecendo uma seleção criteriosa de texturas e tons que convidam a uma experiência tátil e visual mais profunda.
Aqui, o tecido não é um acréscimo — é parte da própria criação.

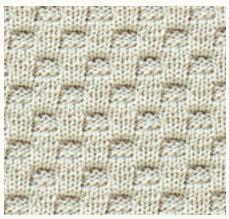

WE—KNIT® 001

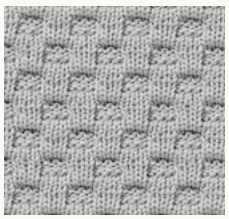

— 100% PET Reciclado

100.000 Martindale
Puxamento de fio: 5 (ISO 1–5)
