WĒNTZ
TĀBUA
LOW TABLES

The Tábua series is inspired by traditional rustic furniture. Its design conveys the simplicity and sense of improvisation of wooden pieces that could have been crafted by the resident of a cabin, using the planks available at the time. The intentional mismatches between the woods bring a natural feel, combined with the lightness and contemporary touch of the stainless steel finish between the planks.
The Tábua series products are available in two versions: 100% solid wood, or recycled PET panels veneered with natural wood — a sustainable alternative that is extremely stable against temperature and humidity variations, while preserving the look and feel of natural wood.

NAME
Tábua Low Tables

DESIGNER
Guilherme Wentz

YEAR OF DESIGN
2023

TYPE
Coffee/Side Table

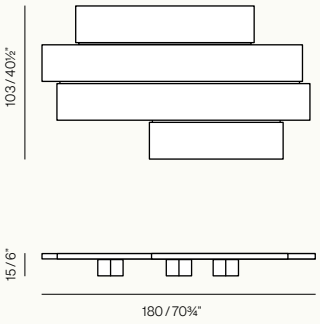

ENVIRONMENT
Indoor

MATERIALS
Recycled PET, Tauari Wood, Stainless Steel

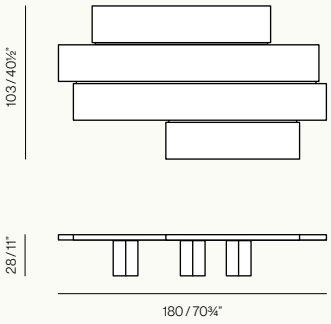

TECHNICAL DESCRIPTION
Coffee/Side table with tabletop in recycled PET high-density foam core, covered by a layer of natural Tauari wood or in solid Tauari wood. Legs in solid Tauari wood. Natural oil finishing. Details and fixing components in brushed stainless steel.

DIMENSIONS / VARIANTS

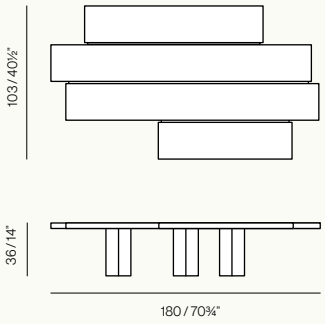

TA11
Tábua Low Table 180 x 15

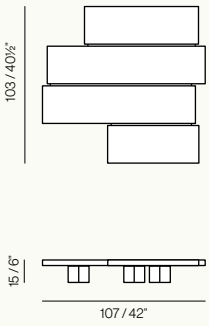

TA12
Tábua Low Table 180 x 28

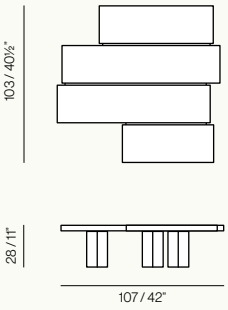

TA13
Tábua Low Table 180 x 36

RECYCLED PET

— The tables were developed with a new construction method that uses recycled PET high-density foam, covered with a thin layer of natural wood. This technology makes it possible to maintain the feel and aesthetics of wood, but reduce its consumption in industry, by replacing solid wood with recycled material, three times lighter and resistant to variations in temperature and humidity.

FINISHING OPTIONS

NATURAL OIL OVER NATURAL TAUARI VENEER

—The oil chosen by WENTZ for the latest wooden products allows high-resistance with the natural look and feel of wood.

This is a 100% natural, non-toxic and highly resistant oil. In addition to not producing volatile toxic to the environment in which the product is located, it is also a safe material for the craftsman who applies it to the product and and environmentally friendly.

The oil finishing facilitates the product maintance, once it can be reapplied to specif parts without causing stains or color saturation.
