WENTZ
TUBO
LOUNGE CHAIR

The latest version of the Tubo Series proposes a more casual and soft seating for lounges, in a new proportion with generous foam tubes and the new WE—KNIT® covering — exclusive WENTZ technology that allows three- dimensional surfaces without seams — which combines recycled PET with natural wool. In a sensorial and fluid path, the tube materializes a long and sinuous design that runs through the parts of the chair in a single breath, like a vegetable that grows intentionally and essentially in search of its function.

WE—KNIT®

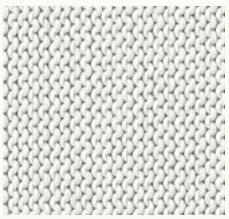

At WENTZ, design extends beyond form — it lives in the very fibers of each piece.
WE—KNIT® is our exclusive 3D knitting technology, developed to create flexible, seamless covers that mold perfectly to the structure, enhancing the purity of the design. This innovation allows each product to be conceived and completed with materials designed by Guilherme Wentz, offering a curated range of textures and tones that invite a deeper tactile and visual experience.
Here, fabric is not an addition — it is part of the creation itself.
