WENTZ VIDRO TABLE

The constant search for lightness in different forms has led to a new project that has the glass as the protagonist. The slim organic shapes explored in other products of the collection give way to the transparency of the “Vidro” (glass in Portuguese) and basic geometric shapes. The wooden base acts as a wedge balancing the glass parts and highlights the action between the elements on the composition. The contrast between glass and wood – warm and cool, natural and artificial – is also explored seeking the balance between textures and meanings of each material.
